ABOUT ME

I am a dedicated and detail-oriented Software Engineer with a strong focus on Frontend Web Development. With hands-on experience in building responsive, user-friendly web applications using HTML, CSS, JavaScript, React, and modern frameworks, I aim to bridge design and functionality to deliver seamless user experiences. I thrive in collaborative environments, enjoy problem-solving, and am passionate about writing clean, maintainable code. Continuously learning and staying updated with the latest web technologies, I bring both creativity and technical precision to every project I work on.

EDUCATION

Ahram Canadian University | 2020-2025

"Computer Science Department in the Faculty of Engineering"

WORK EXPERIENCE

INMOOV Robot Website Project – Personal Project

2024 - 2025

- Designed and developed a fully functional, interactive website for the INMOOV Robot, a 3D-printed, life-size robotic system used in machine vision and object tracking.
- Built a dynamic dashboard using React.js and Sass, with structured page routing and categorized navigation using JSON-configured sections.
- Implemented responsive UI components for sections like Robot Info, 3D Build Instructions, Functions Overview, Component Lists, Gallery, and Contact Form.
- Used JavaScript to enable dynamic features such as object tracking simulation, security alerts, and language switching logic.
- Integrated EmailJS to create a backend-free contact form for seamless communication without requiring server setup.
- Developed backend support with Node.js and structured robot movement data using JSON for API responses and modular control logic.

Student Programming Mentor

2024 - 2025

- Served as a peer mentor, helping fellow engineering students enhance their problem-solving skills through algorithms and coding.
 - Guided students in understanding and applying programming concepts using languages like C++ and Python.
 - Organized training sessions and workshops to prepare students for the ICPC (International Collegiate Programming Contest).
 - Promoted a collaborative learning environment and encouraged participation in competitive programming events.
-

SKILLS

- JAVASCRIPT
 - PYTHON
 - C++
 - HTML
 - CSS
 - React
 - SQL
 - JSON
-

CERTIFICATIONS

- Certification in Advanced React
(online course- Meta academy)(Jul_2024)
 - Certification in JavaScript
(online course-Meta academy)(Jul_2024)
 - Certification in HTML , CSS , javaScript
(online course-johns hopkins university)(Nov_2023)
 - Certification in introduction to artificial intelligence and applications training
(online training - Zewail university)(Aug_2023)
 - Certification in web application technologies and django
(online course - Michigan university)(Feb_2023)
 - Certification in python
(online course-cisco network academy)(Jan_2023)
 - Certification in ICPC ECPC Qualifications collegiate programming
(Educational competition -ICPC)(Aug_2022)
 - Certification in database fundamentals
(online course - mahara-tech)(May_2022)
-
